Description

Imsyser Chaya Dried Leaved Powder are 100% Natural.

Super nutrition & super iron levels for those who need:

- **More energy**
- **Better memory**
- **Improved circulation and skin tone**
- **Improved sugar metabolism**
- **Improved fat metabolism**
- **Excellent for weight-loss**
- **Assists with Diabetes**
- **Assists with heart health**
- **Assists with cholesterol issues**
- **Assists with liver functions.**

Why we are selling Chaya? It's an incidental but significant discovery!

Available in 3 formats:

1. **Capsules 120**
2. **Powder 200g**
3. **Tea Leaves 100g**

**Introducing Chaya (tree spinach) –
Cnidoscopus Aconitifolius/Chayamansa**

Used as food and medicine

Cnidoscopus Aconitifolius is a highly nutritious shrub native to Central America and Mexico where it is has been widely cultivated for use as food and medicine for centuries. It is also referred to as the

Mayan Miracle plant. Now available and planted in South Africa; the Imsyser supplier for our Chaya product range.

Topic of scientific research

Many universities from different countries have done research on this unique plant. The plant has "exceptional nutritional value". It contains essential amino acids and many vitamins and minerals. Twenty Phyto-chemotypes with different therapeutic activities have been revealed in Chaya.

Super nutrition super value

If you'd like to have more energy, a better memory, and even better skin tone ... or if you'd like to stop cold hands and feet, the key is to have healthy circulation especially with Winter. Without good circulation, you may get tired and run out of breath quickly because your heart must pump harder to get your blood moving.

You may get cold hands and feet, because blood can hardly reach your fingers and toes. You may suffer from memory problems, because of insufficient blood supply to your brain. And you may even suffer from skin discoloration and unflattering skin tone, because of a lack of blood flow to your skin.

At Imsyser Health our new discovery can boost your circulation from head to toe, even to tiny capillaries where blood is hard to reach!

Chaya your best circulation

Over and above the value of improved circulation, this one plant, one ingredient product is not only highly nutritious but optimises your natural iron levels and in so doing, increasing your natural energy. Higher Iron also ensure reduced resultant anaemia especially with younger menstruating girls or woman of all ages. of course, a natural given for the iron deficient vegans.

Chaya your best heavy metal detox

imsyser[®]
Health Products

The super antioxidant effect of the Chaya also allows for healthy daily heavy metal detox which makes this supplement unique over and above the other huge benefits as classically seen by our clients using the Chaya range.

Added benefits of taking Chaya:

- Improved sugar metabolism
- Improved fat metabolism, making it great for weight-loss and Diabetes, as well as related heart issues.
- Improved circulation also helping Diabetics and weight-loss candidates including all your circulatory issues including eyesight and tingling hands and feet.
- Improved circulation always allows for better healthier skin, complexion, blood flow & brain health and overall health.
- Improved Liver functioning and Detox
- Improved Cholesterol

Contents:

- 120 x 500mg capsules
- Powder 200g
- Tea Leaves 100g

How to use Chaya Leaf Powder Capsules:

- The convenient way to consume your Chaya every day. Take 6 capsules per day.
- The capsules are not an extract or concentrate, therefore 6 capsules need to be taken. It can be taken in the morning with breakfast.
- Powder form might be used in smoothies or shakes
- Leaves might be used as a nutritional tea or added to a tea

Some of the research done on Chaya

Phytochemical content.

Phytochemical analysis of leaf extract of *Cnidoscolus Chayamansa*

Research: Periyar University, India. Colleges of Pharmacy.

Article: International Journal of Pharmacognosy and Phytochemical Research 2014-15; 6(4) "In our previous study, we have proved that the anti-oxidant, antidiabetic activity is associated with the active constituents of *Cnidoscolus chayamansa*. The present study also provides the evidence that ethanolic extract of *Cnidoscolus chayamansa* contains medicinally important bioactive compounds and this justifies the use of plant species as traditional medicine for treatment of various diseases."

Blood glucose

Effect of *Cnidoscolus Aconitifolius* leaf extract on the blood glucose and insulin levels

Research: Centre for Complementary and Alternative Medicine, School of Public Health, Morgan State University, Baltimore, MD 21251, USA.

Article: Europe PubMed Central

"For moderately diabetic mice, CA and chlorpropamide decreased the glucose levels by 25.6% and 16.3% respectively while for the severely diabetic mice, CA decreased the blood glucose by 43.7%. It is proposed that CA has an insulinogenic property that possibly stimulated dormant beta-cells to secrete insulin."

Blood sugar support

Phytochemical screening, nutritional profile and anti-diabetic effect of ethanolic leaf extract of *Cnidoscolus Aconitifolius* in streptozotocin induce diabetic MICE Research: Department of Pharmacy, Faculty of Biological Science and Technology, Jessore University of Science and Technology, Jessore-7408, Bangladesh

www.imsyser.co.za | 086 010 3859 | info@imsyser.co.za

Article: IJBCP International Journal of Basic & Clinical Pharmacology
"Our achieved result revealed the ability of Cnidocolus aconitifolius to lower blood glucose level and contained remarkable amount of various Phyto components as well; hereby suggesting that it could serve as a better therapy for diabetes mellitus."

Anti-Hyperglycemic

Anti-hyperglycemic effect of alcoholic extracts of Cnidocolus Chayamansa in experimental diabetes and their effects on key metabolic enzymes involved in carbohydrate metabolism

Research: Department of Biotechnology, Periyar Maniammai University, India. Joint Director of Medical Education (Pharmacy)

Article: International Journal of Research in Pharmacy and Chemistry
"In conclusion, the extract of C. Chayamansa at high dose and low dose exhibited significant anti-hyperglycemic activity in normal and alloxan-diabetic rats. This extract also showed improvement in the parameters like body weight, liver glycogen content and carbohydrate metabolizing enzymes as well as regeneration of B-cells of pancreas and so might be of value in diabetes treatment."

Effect on cholesterol

Hypolipidemic activity of ethanolic extract of leaves of cnidocolus chayamansa

Research: Department of Biotechnology, Periyar Maniammai University, Vallam, (T.N.) INDIA

Article: Acta Chim. Pharm. Indica: 2(1), 2012, 24-31 ISSN 2277-288X
"Extract showed significant hypolipidemic effect by lowering the serum levels of biochemical parameters such as a significant reduction in the level of serum cholesterol, triglyceride, LDL, VLDL and increase in HDL level which was similar to the standard drug Atorvastatin. Ethanol extract exhibited significant atherogenic index and percentage protection against hyperlipidaemia. These biochemical observations were in turn confirmed by

Health Products

www.imsyser.co.za | 086 010 3859 | info@imsyser.co.za

histopathological examinations of aorta, sections and are comparable with the standard hypolipidemic drug Atorvastatin."

Liver support

Cnidocolus aconitifolius leaf extract protects against hepatic damage induced by chronic ethanol administration in wistar rats.

Research: Drug Metabolism and Toxicology Research Laboratories, Department of Biochemistry, Faculty of Basic Medical Sciences, University of Ibadan

Article: Oxford Academic Medical Council

Supplementation with CA significantly ($P < 0.05$) decreased the activities of liver marker enzymes, stabilized the lipid profiles and restored the antioxidants status of ethanol-treated rats. The activities of CA were comparable with KV in the ethanol-treated rats. This observation was supported by histopathological examination of liver slides. These findings suggest the hepatoprotective and antioxidant effects of CA leaf extract, which offered protection against ethanol-induced toxicity.
